Dear Parents / Carers

Internet Safety

The internet is in so many ways a wonderful resource, however, it can be a real source of worry to parents and ourselves here in school.

As more children will be accessing the internet over the school closure – throughout this period we would like to support our parents and pupils in staying safe online. Information about online safety can be found on our website: http://www.jamescambell.com/?page_id=4576

In assemblies at school, we have shared the importance of staying safe when using the internet, this includes different sites they like to use. We have also encouraged them to speak out if they feel uncomfortable in any way about something they have seen, heard or read, or have been subject to on the internet.

As well as the information on our school website, below are some really useful websites that give advice and guidance for parents. I have also included further links for parents and children to ensure they stay safe online.

If you feel in any way we can offer you or your child any further support please do not hesitate to contact one of the year group emails, and if you would like to share these resources with other parents and carers please do so.

At James Cambell Primary School we believe it is everyone's role to try to ensure young people are doing all they can to stay safe on the internet.
